CAREER OBJECTIVE

Artificial Intelligence & Data Science undergraduate with hands-on experience in Machine Learning, Python, SQL, Data Analytics, and Cloud Platforms. Seeking an entry-level role in AI/Data Science/Cloud to apply technical knowledge, contribute to impactful projects, and drive data-driven solutions.

EDUCATION

B.Tech in Artificial Intelligence & Data Science CGPA: 8.58/ 10 REVA University, Bengaluru, Karnataka	2023 – 2027
12th / PUC – CBSE Board Percentage: 64.2% CMR National Public School, Bangalore	2023
10th / SSLC – CBSE Board Percentage: 68.4% Narayana Olympiad School, Bangalore	2021

SKILLS

Programming Languages: Python, SQL

Machine Learning: Classification Models, Logistic Regression

Data Analytics & Visualization: Excel (Charts, Conditional Formatting), Power BI, KPI Dashboards, Agile Methodology, Numpy

Database & Cloud: MySQL, DBMS, Normalization, Informatica IDMC, Big Data, Cloud Computing

CRM & Platforms: Salesforce (40+ Trailhead Badges), Copado (Salesforce DevOps), GitHub

Testing: Software Testing (Automation & Functional)

ACADEMIC PROJECTS

AI Driver Risk Monitor | Patent Applied | Live Deployment

Tech Stack: Python, Scikit-learn, Pandas, NumPy, HTML, CSS

- AI-powered driver safety platform — real-time risk classification (Safe/Medium/High), voice alerts, driver image analysis, trip history & CSV export. Deployed live on Render.

Live Demo: ai-driver-risk-monitor.onrender.com **Source Code:** github.com/amisha160

Sales Performance Dashboard | Tool: Power BI

- Interactive KPI dashboard for Sales, Profit & Quantity — regional, category-wise, and trend-based analytics with dynamic slicers.

SQL Sales Analysis Project | Tool: MySQL

- Designed relational sales DB; used Joins, Aggregations & Group By to identify revenue-driving customers and profitable categories.

Velora Dining – Restaurant Web Application | HTML5, CSS3

- Responsive restaurant site with cart system, GST billing, QR payment interface. Published live via GitHub Pages.

Live Demo: amisha160.github.io/velora-dining/ **Source Code:** github.com/amisha160

Additional Projects

- Student Academic Performance Prediction – ML classification model for student performance forecasting
- Pharmacy Management System – Normalized relational database

CERTIFICATIONS

Generative AI Essentials: From Foundations to Practical Application – IBM SkillsBuild (with REVA University & BharatCares), Sep 2026
| Copado Certified – Copado (Salesforce DevOps) | Enterprise Data Science – IBM | Cloud Computing Fundamentals – IBM | Big Data Analytics – Simplilearn | Data Analytics – Simplilearn | Power BI | MySQL | Leadership Principles for Software Engineers – Coursera | Inspiring Peak Performance – Coursera

ACHIEVEMENTS

- Patent Applied for AI-Based Smart Driver Behavior Analysis and Risk Profiling System (application submitted; response awaited)
- Research Paper in Progress on Machine Learning-based Driver Behavior Analysis (draft stage)
- Earned 40+ Trailhead Badges on Salesforce | Multiple end-to-end AI and web projects deployed and maintained on GitHub

LANGUAGES & INTERESTS

Languages: English (Fluent), Kannada (Fluent), Telugu (Fluent), Tamil (Fluent), Hindi (Can understand; not spoken)

Interests: Machine Learning, Data Analytics, Cloud Platforms.
